2000 *InTech* Article Title Index

Title	Page #
January	
Year 2000 Outlook: The corporate structure spans sensor and satellite	36
How will the 'Net century handle the human factor?	42
Water recycles cash at textile plant	47
Flow goes with eccentric rotaries, globes, and butterflies	50
February	
Hackers seek leaks in insecure Web sites	38
Ethernet stampede in full swing	43
Wastewater treatment bubbles better with open automation	48
Information flows at analytical labs	52
Tracking temperatures back to the source	56
March	
Faster, better, cheaper	42
Statistical analysis rides the bus	48
Neural nets have arrived	52
Laser on the level	56
April	
Spreading the word on wireless	38
Multivariate statistical process control hones a batch	42
Zoning in on intrinsic safety	46
Killer chips didn't invade after all	50
The New Engineer	90
May	
Explosive, toxic gases have no place in the work area	40
Mum's the word on process MEMS—for now	44
Why do accidents and disasters keep happening?	49
Digital process equipment not keen on dirty power	54
June	
Windows CE 3.0 seen ready for prime time and real time	46
Intelligent connected devices are the future	50
Integrated automation erects Three Gorges Dam	54
Software squeezes time, produces money	62
July	
Using Ethernet is a no-brainer	36
Seized opportunity and tenacity clean water	40
Ultrasonics reverberate through flowmeter market	44
Overcoming layoff survivor sickness	65
August	
Engineers see hike in incomes	58
Exploit advanced technologies for predictive maintenance	62
Trajectory slope control takes on traditional algorithms	72
What about BOB?	77
Industry searches for future in midst of change	80
September	
Process plant control systems to match e-commerce demands	44
Ethernet and the Web gang up on process monitoring and control	48
Plan and design the best gas detection	52
Businesses partner with the power of Web players	67
October	
The good news is in the envelope: The check is not in the mail	36
Innovative system controls pulp consistency	41
Internet-based plant management?	44
Poor procedures cause an explosion	48
Why self-validating devices?	50
November	
EXPO builds a global connection	46
Digital bus installations are safer and cheaper	54
Smaller firms get ERP opportunity	59
The ways and means of density measurement	86
December	
Salted away for a rainy day: A half-billion barrels of crude	32
No flash in the pan	37
Fiber optics at the landfill: Beauty and the beast	40
Sensor system for environmental applications	45
Noise promises failure	48
Recipe for migration	52
